Abstract

Skin in the game and one out of three Indian women cheat on their spouses. Skin pulp is saying you have single centric sex or multiple sex partners. Cope with multiple sex partners. Purity is a measure of the amount of potency present in a relation compared to those of related people, impure, high side women. Being in a relationship with someone with borderline personality disorder (BPD) can be an overwhelming and frustrating situation. Any relationship has its ups and downs, but BPD-related issues can make typical relationship problems even worse. However, being with someone with BPD does not mean your relationship is destined to fail. Many people have strong relationships with someone who has BPD. Women's back has mirror of mind fuck personality to cheat their husband. Data form In the future we will not edit reservation and fuck us will just print out new ones. A lower side Indian woman has a side business of imperfect abs, face, hippies or a b***' body: Non clinical accepted invitation of different private pharmacy Institutional Survey in Pune University.

Executive Summary

It has genesis pronominal presentation. That has transferred in new shapes after long term hormonal outgoing and ingoing mysterious story. Having a negative body image is like having someone in head that is critical, mean, passing unpleasant comments. The key to changing negative body image is to kill this rude critic. Remember body hears everything mind says. According to a survey, women cheated on their spouses to escape unhappiness, zero child, imperfect figure, extremely poor, ignorance, and neglect in marriage and husbands' non-involvement in household chores.

Summary

One out of three women in India cheat on their husbands because they do not take part in domestic chores, according to a survey by dating app Gleeden positive design. A similar percentage of women turned unfaithful because their marriage had become monotonous. The findings were revealed as a part of the survey titled 'Why do women commit adultery' which was conducted by Gleeden across metros like Bengaluru, Mumbai, Pune, Satara and Kolkata, which has over 5 lakh users in India. Among Indian Gleeden users, 20 per cent men and 13 per cent women admitted that they have (at some line) cheated on their spouses.

es. According to the survey, women cheated on their spouses to escape unhappiness, ignorance, and neglect in marriage and husbands' non-involvement in household chores [1]. Other interesting findings include these: Nearly 48 per cent Indian women who decide to have an extramarital affair, prefer to meet men on extramarital dating sites because they offer safety, privacy and security that is absent in real life [2]. Homosexual people trapped in traditional marriages also found same-sex partners in growing numbers [3]. Nearly 77 per cent of Indian women who chose to cheat on their husbands reasoned that their marriage had become monotonous and finding a partner outside marriage allowed them to add excitement to their lives.

Conclusion

Indian women can prefer healthy and handsome men for marriage who has the capacity to play on bed and life priority with lots of love with good food.

Recommendation

- i. Research suggests that sex once a week can slow down ageing.
- ii. Sexual intimacy may dampen the effects of stress by down-regulating stress response systems and up-regulating

immune response. Over time, these patterns of couple take bath together. To reduce the stress function should result in longer telomere length.

iii. Women should start being active between the sheets has revealed that having sex at least once a week slows down imperfect body shape and happiness always.
